Philosophy

SYMBOL

Data, Chart, Tornado

The WICKED STORM CI embodies the vision of
'A global EdTech company shaping a new era of learning through data and AI'
and symbolizes our will to stir up a new storm in the digital learning market.
Powered by advanced AI, we create digital learning services that benefit society.

Milestones

HISTORY

Learning-data company founded

AI solution development & build

AI business expansion & growth

- 2021 01 Wicked Storm Inc. founded
01 KIRD, learning analytics consulting for next-gen integrated education system
05 Visang Education, Smart-Wangong platform consulting & build
06 MPM, National HRD Intelligent Open Platform (Phase 2) – LRS build
- 2022 01 LRS product development
04 MSIT, corporate R&D institute accredited (AI Education Technology Lab)
05 MPM, National HRD Intelligent Open Platform (Phase 3) – real-time video xAPI collection
06 KERIS, K-Edu Integrated Platform ISMP – platform design & analytics standards
08 Venture Business Certification
08 KITA, full-cycle FTA Integrated Platform program
12 Seoul Metropolitan Government, Seoul Education Platform – LRS build
- 2023 05 Lecognizer, intelligent learning analytics solution, launched

- 2023 06 KERIS, AI Digital Textbook development guidelines authored
07 KERIS, AI-based elementary math class support system enhancement
08 Lecognizer certified as an xAPI LRS by U.S. ADL
09 MSS, SME Technology Development Stepping-Stone Program selected
10 KERIS, AIDT curriculum standards distribution model design & pilot
11 MOTIE, AI for process-based assessment (Yr 1 – CASE knowledge space)
12 Dong-A Publishing, AI Digital Textbook platform build
- 2024 01 KERIS, AI-based elementary math class support system operation
04 Lecognizer Grade 1 GS certification and copyright registration
04 KERIS, learning data framework for AIDT – data hub, national analytics metrics, curriculum standards & learning maps

- 2024 06 Lecognizer listed on the PPS Digital Service Mall (Korean public procurement)
06 Learning analytics diagnosis & recommendation model v1.0 certified (KOLAS)
08 Patent filed: anomalous learning detection from xAPI behavior data
08 Patent filed: LLM-based learner profiling for disposition analysis
- 2025 01 KERIS, AI-based elementary math class support system operation
02 Patent registered: LLM-based learner profiling for disposition analysis (No. 10-2767110)
05 MSS, SME Technology Innovation Program (market-responsive) selected
05 Inno-Biz certification (AA)
07 Gangwon Office of Education, Gangwon i-ro AI platform build
08 KERIS, learning data collection linkage for AI digital learning materials (provincial offices)

- 2025 09 NICE D&R, Nomubi.com next-generation system build
11 Patent registered: anomalous learning detection from xAPI behavior data (No. 10-2883249)
- 2026 01 Gangwon Office of Education, Gangwon i-ro AI platform operation
01 Gyeonggi Office of Education, Hi-Learning AI platform operation
01 Gyeonggi Office of Education, AI-based teacher competency support system – LRS build
03 Learning data hub linked to AI digital learning materials – LRS maintenance
03 KERIS, international-standard learning data standardization & utilization model
04 1EdTech Korea founding board member; 1EdTech Global Contributing Member
04 MSS, 2026 Tech Commercialization Package Program (gov. R&D top project)
05 KERIS, operating model study for a public digital badge platform

Business Areas

BUSINESS LINE

We provide custom AI development, AI analytics solutions, and data consulting tailored to each client's needs and environment.

Custom AI Development

We design, build, and operate **custom AI-powered systems** optimized for your environment and needs.

AI Analytics Solution

AI analytics solutions that integrate with **learning and competency systems** in schools, universities, enterprises, and public institutions.

Data Consulting

Data quality & strategy, indicators, AI model design – services for data-driven decisions.

Solutions

LECOGNIZER

 Global-standard learning data store with AI anomaly detection

Lecognizer collects and stores learning data from every teaching, learning and operations activity in real time, using global standards; its AI flags unusual signals and builds the evidence for learning design.

Global-standard learning data store
Lecognizer | v1.0

Global-standard learning data collection & storage

Collects and stores learning data from **all teaching, learning and operations activities in real time**. Data from different systems follows the same global standards, so it carries over when systems change.

Anomaly signal detection by Lecognizer AI (2 registered patents)

Lecognizer AI analyzes learning data and flags **unusual signals and sections many learners find hard**. It ranks the signals that need attention, so administrators and instructors see what they might miss.

Data lookup, visualization & reports

An integrated dashboard and custom charts show how learning data flows at a glance. Detailed filtered queries, JSON/CSV downloads, and PDF/HTML/PNG reports.

Scalable operation with proven deployments (Grade 1 GS certification)

Built for scalability and high availability to handle learning data at scale. Deployed in a national learning data hub and in public and enterprise platforms.

Solutions

LECOGNIZER Processing Capacity

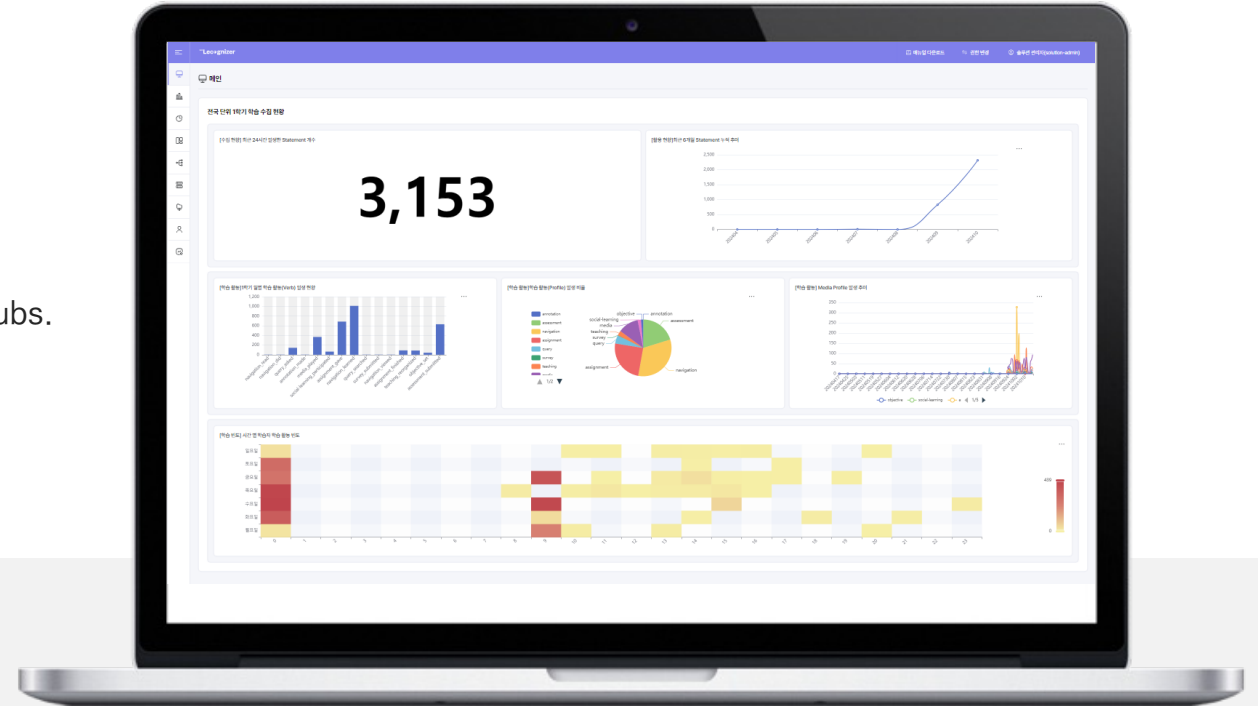

Built to process learning data at national scale

Designed with scalability and high availability for national-scale learning data hubs.
Built to fit education platforms of every scale,
it serves schools, universities, enterprises and public institutions.

Processing capacity 11,000 TB/day · 400M messages/day · 250 RPS/core

Broad applicability Fits education platforms of all sizes

※ Processing-capacity figures (designed for a 2.7M-learner data hub)

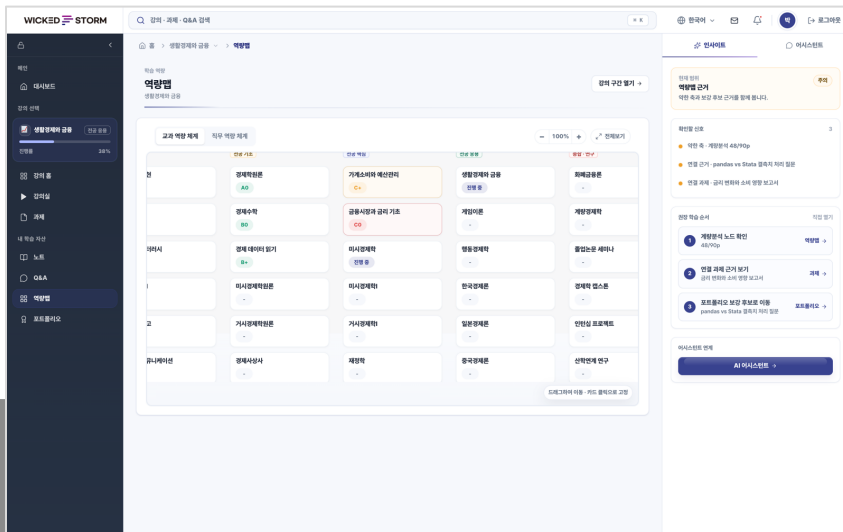

Solutions

LEARNHUBBLE AI

Personalized teaching & learning platform with AI interaction

LearnHubble AI is a learning experience platform where administrators, instructors, and learners interact with AI to make decisions and take action.

※ Prototype screens (in development)

AI-interactive teaching & learning platform

LearnHubble AI

Lesson Design | Refine lesson design with AI

Instructors **review and apply AI drafts** to their lesson design.

Classroom | Real-time interaction with AI

An AI panel opens **automatically** when help is needed.

Assignments | AI hints triggered by detected signals

AI gives **structure-and-condition hints**, not answers.

Academic Competency Map | View linked competency frameworks

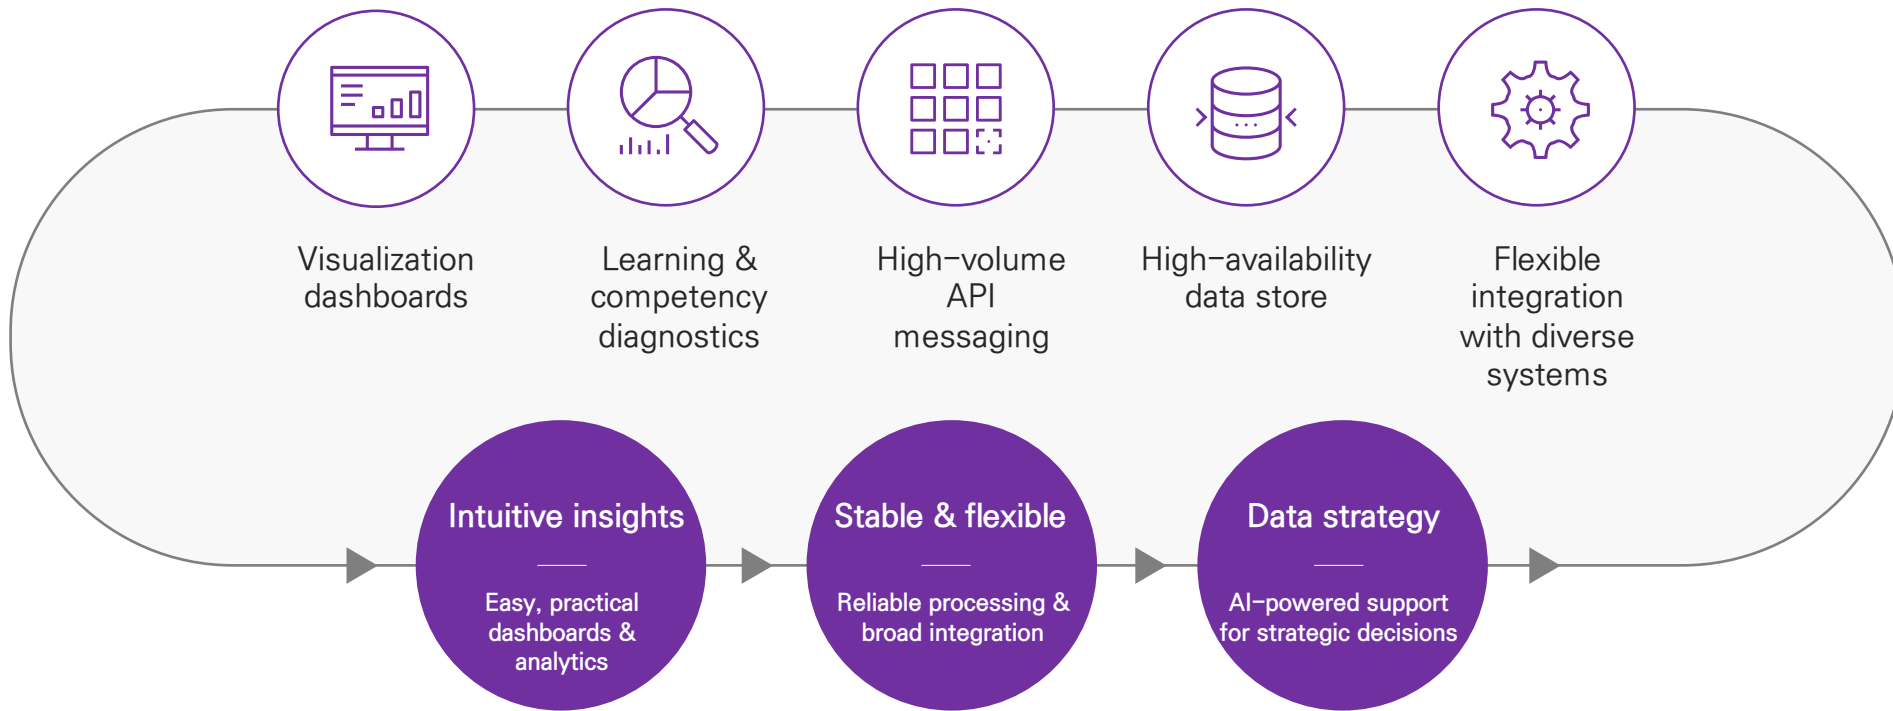

Academic and job-related frameworks, shown in a **1EdTech CASE-based map and portfolio**.

Solutions

LECOGNIZER

Key Features

An AI analytics solution that adapts flexibly to how institutions and enterprises collect, analyze, and visualize learning & competency data.

Specialized in high-performance, high-stability learning & competency analytics

Data Consulting MOE | CASE Standards

1EdTech CASE Framework–Based Curriculum Standards

In the AI Digital Textbook program, we built 1EdTech CASE¹⁾ framework–based curriculum standards, resolving asymmetry and disconnects among textbooks, content, and other curriculum elements, and laying the groundwork to link learning goals with competencies.

Extending to universities, public bodies, and enterprises, we aim to provide a foundation that ensures coherence and consistency across complex learning elements.

1) CASE (Competencies and Academic Standards Exchange) is an international edtech standard for curriculum frameworks. Using its information model, developers' curricula and learning maps align with the national curriculum.

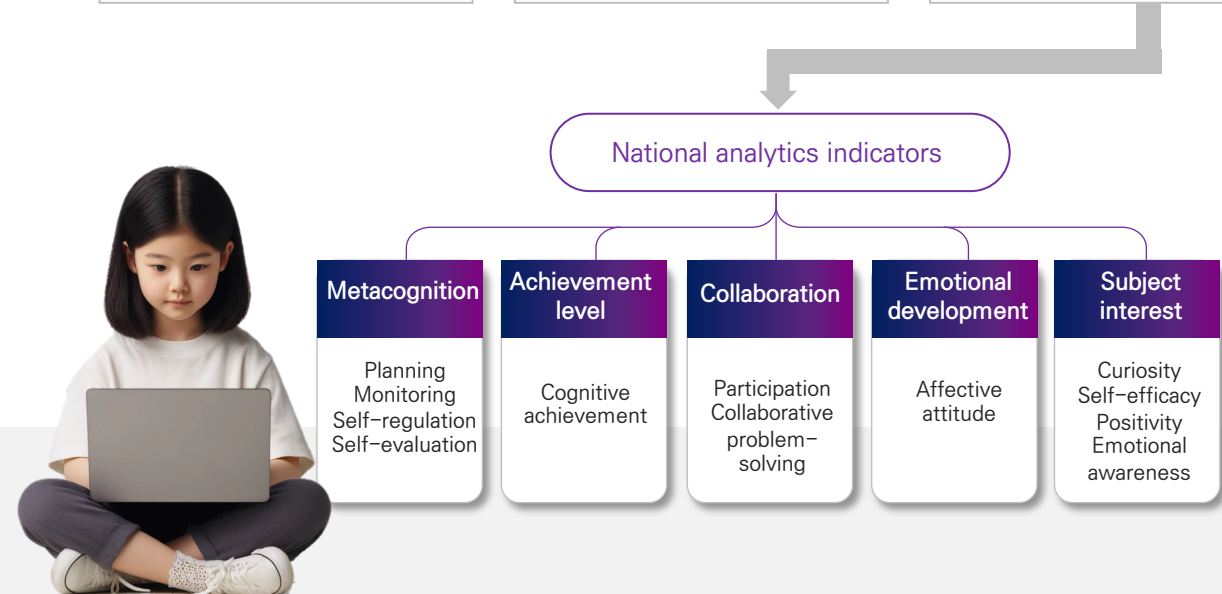

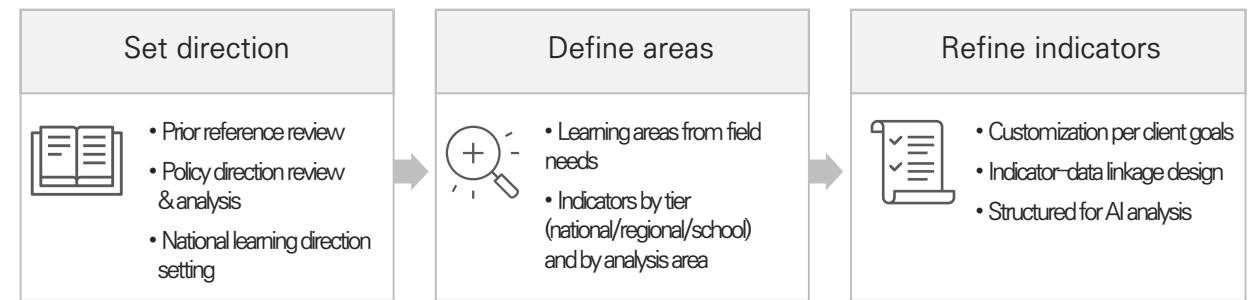

References

Data Consulting MOE | Indicator Design

Indicator Design Consulting for AI Learning Analytics

We know how to design and systematize key indicators for outcome prediction and competency diagnosis from education data.

Reflecting input from educators, service operators, and other stakeholders, and drawing on our experience designing indicator frameworks that are both valid and practical in the field, we implement custom AI analytics frameworks optimized for each organization.

Custom AI Development

 MOE | Learning Data Hub

AI-Based Learning Data Hub Platform

Built on global standards, we collect learning data from countless institutions and developers in real time, and provide an AI-powered automated data environment that turns it into shared data assets.

Built on years of experience designing AI-based hub systems, we deliver convenient, secure learning data analytics services.

1) AI & big-data learning analytics at national (policy), regional (office of education), and school (school-unit) levels.

Core Strengths

AI·DATA Expert Organization

Our R&D is led by the AI Education Technology Lab, our corporate research institute accredited by the Ministry of Science and ICT.

EdTech specialists

AI platform developers

Data consultants

AI experts

1) AIDivision: a digital strategy partner solving problems for enterprises and institutions – client-tailored consulting, system design & build, and AI model development, powered by AI algorithms and data expertise.

Core Strengths

Proven Technical Excellence

Our technology and growth potential are officially recognized by leading institutions.

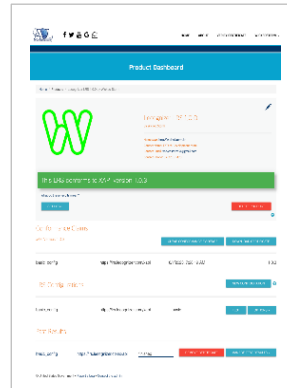

GS Certification

Cert. no.: KTL-GS-24-0035
 Software: Lecognizer V1.0
 Grade: Grade 1 (highest)
 Item: xAPI learning data
 storage & visualization SW
 Certified by: Korea Testing
 Laboratory (KTL)

Software quality & stability assured

LRS International Certification (ADL)

Product: Lecognizer LRS 1.0.0
 Company: Wicked Storm
 xAPI version: 1.0.3
 Certified: August 1, 2023
 Certified by: ADL (US)

Meets the global learning
 data standard
 Accurate, precise data collection

AI Model Certification

Product: Learning analytics
 diagnosis & recommendation model
 v1.0
 Company: Wicked Storm Inc.
 Test item: AI algorithms
 Cert. no.: 2024-122-VSW-K
 Certified by: KOLAS

AI algorithm conformity assured

Core Strengths

Proven Technical Excellence

Our technology and growth potential are officially recognized by leading institutions.

AI Patent

App. no.: 10-2024-0111545
Reg. no.: 10-2767110
Title: LLM-based learner profiling method for learner disposition analysis
Applicant: Wicked Storm Inc.
Filed: Aug 20, 2024

AI algorithms for learner analysis

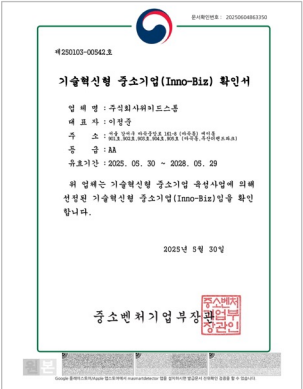

AI Patent

App. no.: 10-2024-0111546
Reg. no.: 10-2883249
Title: Anomalous learning detection system based on xAPI learning behavior data
Applicant: Wicked Storm Inc.
Registered: Nov 4, 2025

AI algorithms for behavior detection & prediction

Venture & Inno-Biz Certifications
